Neck wallet / waist bag by BUSHMEN

Discreetly worn on the neck, hidden below your shirt, your Neck wallet / waist bag by BUSHMEN offers you easy access to your documents, money or phone, while securing them excellently against theft.

Product Description

Neck wallet / waist bag

The safest way to protect yourself from theft is… secrecy. Comfortably worn on the neck below your shirt, or discreetly on your belt, the passport holder is the ideal example for the above mentioned rule. On the one hand it will guarantee you an easy access to your documents, money or phone.

Pockets

Thanks to 2 zipped pockets and 3 pockets with hook and loop fastener, your documents, money and other important things are all in their right place.

Comfort

The Neck wallet / waist bag has a soft padding on its back, which does not make your skin sweat, even if worn directly on it, and guarantees a comfortable feeling.

Safety

Additionally the back of the passport holder has a special loop, which offers another way to secure yourself from theft, by pulling an additional rope through the loop, that can be tied around your hips

(a potential thief might cut the rope around your neck, where he can see it, but he STILL has no chance of robbing us).

Another way to wear your Neck wallet / waist bag is putting it together in half (with the help of a special hoop and loop fastener on its back) und after pulling your belt through the loop, wearing it directly on your hips (e.g. between your trousers and your shirt as a so-called moneybelt – a pocket for valuable things and money that is invisible to others) or in the classic way, as a so-called bumbag.
